

## Subtracting Fractions Extra Practice Work Sheets

1.  $3\frac{3}{4} - 2\frac{1}{4}$

2.  $7\frac{1}{6} - 4\frac{5}{6}$

3.  $8\frac{2}{5} - 4\frac{1}{2}$

4.  $11\frac{1}{6} - 7\frac{3}{4}$

5.  $16\frac{5}{7} - 12\frac{1}{3}$

6.  $23\frac{1}{6} - 15\frac{7}{8}$

7.  $14\frac{2}{3} - 5\frac{11}{12}$

8.  $10\frac{1}{5} - 4\frac{2}{3}$

$$9. 29\frac{1}{4} - 17\frac{3}{7}$$

$$10. 25\frac{3}{8} - 13\frac{11}{12}$$

$$11. 19\frac{3}{8} - 4\frac{4}{5}$$

$$12. 27\frac{1}{2} - 17\frac{3}{4}$$

$$13. 31\frac{1}{4} - 25\frac{4}{5}$$

$$14. 8 - 4\frac{1}{6}$$

$$15. 15\frac{1}{6} - 6\frac{7}{9}$$

## Answers

$$1. 3\frac{3}{4} - 2\frac{1}{4} = 1\frac{2}{4} = 1\frac{1}{2}$$

$$2. 7\frac{1}{6} - 4\frac{5}{6} = 6\frac{7}{6} - 4\frac{5}{6} = 2\frac{2}{6} = 2\frac{1}{3}$$

$$3. 8\frac{2}{5} - 4\frac{1}{2} = 8\frac{4}{10} - 4\frac{5}{10} = 7\frac{14}{10} - 4\frac{5}{10} = 3\frac{9}{10}$$

$$4. 11\frac{1}{6} - 7\frac{3}{4} = 11\frac{2}{12} - 7\frac{9}{12} = 10\frac{14}{12} - 7\frac{9}{12} = 3\frac{5}{12}$$

$$5. 16\frac{5}{7} - 12\frac{1}{3} = 16\frac{15}{21} - 12\frac{7}{21} = 4\frac{8}{21}$$

$$6. 23\frac{1}{6} - 15\frac{5}{8} = 23\frac{4}{24} - 15\frac{15}{24} = 22\frac{28}{24} - 15\frac{15}{24} = 7\frac{13}{24}$$

$$7. 14\frac{2}{3} - 5\frac{11}{12} = 14\frac{8}{12} - 5\frac{11}{12} = 13\frac{20}{12} - 5\frac{11}{12} = 8\frac{9}{12} = 8\frac{3}{4}$$

$$8. 10\frac{1}{5} - 4\frac{2}{3} = 10\frac{5}{15} - 4\frac{10}{15} = 9\frac{20}{15} - 4\frac{10}{15} = 5\frac{10}{15} = 5\frac{2}{3}$$

$$9. 29\frac{1}{4} - 17\frac{3}{7} = 29\frac{7}{28} - 17\frac{12}{28} = 28\frac{35}{28} - 17\frac{12}{28} = 11\frac{23}{28}$$

$$10. 25\frac{3}{8} - 13\frac{11}{12} = 25\frac{9}{24} - 13\frac{22}{24} = 24\frac{33}{24} - 13\frac{22}{24} = 11\frac{11}{24}$$

$$11. 19\frac{3}{8} - 4\frac{4}{5} = 19\frac{15}{40} - 4\frac{24}{40} = 18\frac{55}{40} - 4\frac{32}{40} = 14\frac{23}{40}$$

$$12. 27\frac{1}{2} - 17\frac{3}{4} = 27\frac{2}{4} - 17\frac{3}{4} = 26\frac{6}{4} - 17\frac{3}{4} = 9\frac{3}{4}$$

$$13. 31\frac{1}{4} - 25\frac{4}{5} = 31\frac{5}{20} - 25\frac{16}{20} = 30\frac{25}{20} - 25\frac{16}{20} = 5\frac{9}{20}$$

$$14. 8 - 4\frac{1}{6} = 7\frac{6}{6} - 4\frac{1}{6} = 3\frac{5}{6}$$

$$15. 15\frac{1}{6} - 6\frac{7}{9} = 15\frac{3}{18} - 6\frac{14}{18} = 14\frac{21}{18} - 6\frac{14}{18} = 8\frac{7}{18}$$
